

Involve Encode™

Surround to Stereo down-mix & Universal stereo audio format

Involve Audio have revolutionised audio by creating an immersive, natural and true to intent universal down-mix that works across all devices.

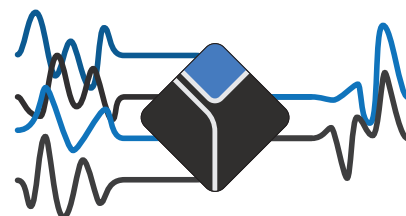

Working with any container and standard audio device, **Involve Encode™** can be listened to in stereo with existing stereo systems or headphones or in pure surround sound through systems equipped with **Involve Decode™**.

Applications

- CD, DVD, Bluray down-mixes
- Television
- FM/Digital Radio
- Internet Streaming

Works on

- Stereo Hi-Fi systems
- Surround Sound systems
- Headphones
- Portable Devices

Involve Encode™ is a highly accurate **universal surround sound to stereo down-mix** with no compromise in quality or loss of sound stage making it an ideal stereo and surround format for CD, DVD, Bluray and digital high quality music and movies.

Involve Encode™ is **not bandwidth dependent** and enables surround sound tracks to be transmitted in low bandwidth media such as FM/Digital Radio, TV, Youtube or Spotify.
